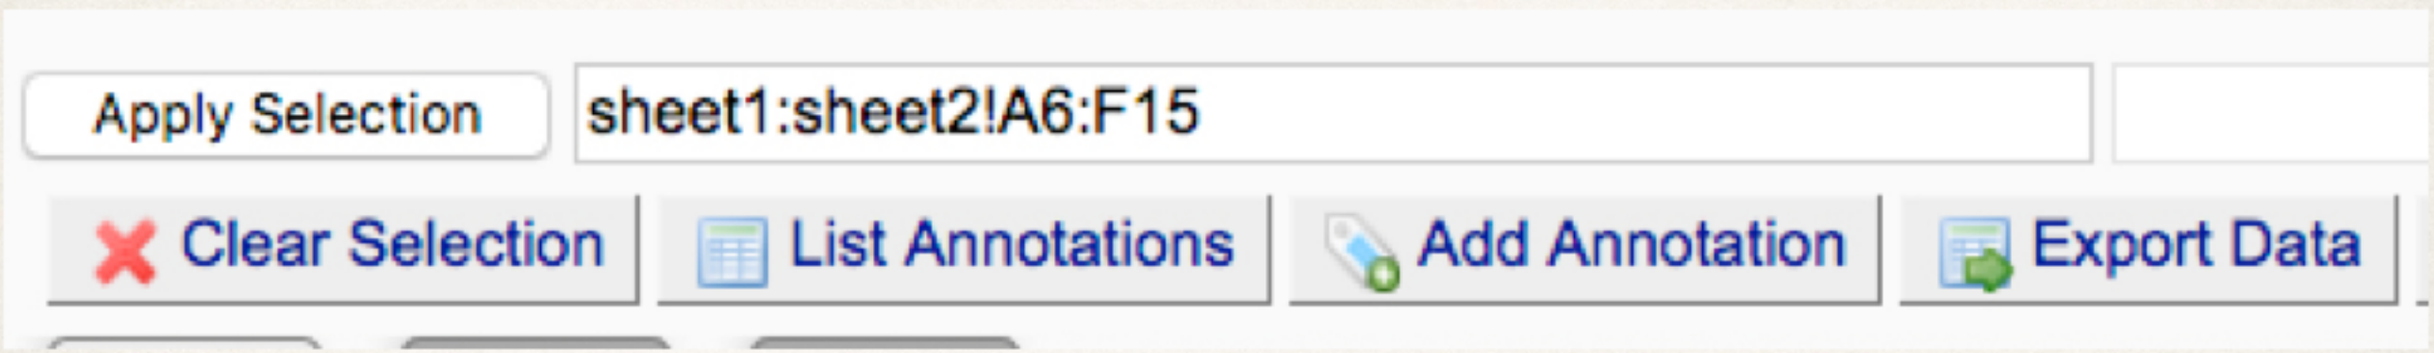
Spreadsheet Selections via input text



- Excel-like syntax:
  - A2, B1:D20, F10:E1, …
  - this selects from the active sheet
- Can include selections from different sheets:
  - sheet1!B1:D20, sheet2:sheet4!F10:E1
- Behind the Scenes: restructuring of the system
  - How spreadsheet data is read for processing.
  - Preparation for multiple files selection, XML/JSON export
